

Metal Art PVD

Premium PVD Coated Dining Ware & Cutlery

PVD Coated Dining Ware:

At Metal Art PVD, we redefine the elegance of stainless steel through our exclusive PVD-coated dining ware collection. Each piece undergoes advanced Physical Vapor Deposition (PVD) coating — a process that fuses metallic layers at a molecular level, giving a rich gold or titanium finish. The result is durable, corrosion-resistant, and visually stunning dining ware ideal for luxury setups, catering, and hospitality spaces.

PVD Coated Cutlery:

Our cutlery range combines precision engineering with sophisticated design. Every fork, knife, and spoon is crafted from high-grade stainless steel and finished with PVD coating to ensure long-lasting shine, scratch resistance, and a premium aesthetic. Whether for formal dining or high-end events, our cutlery sets elevate every experience with elegance and performance.

Our Commitment

Metal Art PVD stands for innovation, craftsmanship, and excellence. With our in-house manufacturing expertise and modern coating technology, we continue to serve clients across India with premium stainless steel solutions.
